RESOLUTION ON THE REPORT OF THE HEALTH OFFICER OF THE PORT OF CALCUTTA FOR THE YEAR 1890.

No. 1227 Marine.

GOVERNMENT OF BENGAL—MARINE DEPARTMENT.

Dated Calcutta, the 2nd May 1891.

RESOLUTION.

READ—

A letter No. 1873, dated the 23rd March 1891, from the Sanitary Commissioner for Bengal, submitting the report of the Health Officer of the Port of Calcutta for the year 1890.

The subjoined table shows the number and description of vessels inspected by the Health Officer of the Port during the past five years—

YEAR.	INWARD-BOUND VESSELS INSPECTED.		OUTWARD-BOUND VESSELS INSPECTED.		Total number of inspections.
	Foreign-going.	Coasting.	Foreign-going.	Coasting.	
1886	...	660	52	660	1,516
1887	...	630	100	699	1,601
1888	...	568	88	629	1,464
1889	...	559	112	598	1,443
1890	...	530	117	576	1,394

These figures do not accord with that portion of the explanation given in the report which attributes the decrease in the total number of inspections to less frequent inspections of coasting steamers. The largest decrease appears under the head of vessels bound inward from foreign ports. His Honour thinks it important that the coasting vessels which carry large numbers of native passengers should be frequently inspected by the Health Officer.

2. During the year under review the Health Officer submitted particulars of vessels which on inspection he found to have badly-ventilated crew accommodation. In regard to the vessels trading with the United Kingdom, the Board of Trade have taken steps to ensure compliance with the Regulations relating to accommodation and ventilation issued under the provisions of section 9 of the Merchant Shipping Act, 1867. The ventilation of the crew spaces of the vessels trading with Indian and Chinese ports has in several cases been improved at the instance of this Government.

3. The Health Officer brings to notice the absence of properly-protected bathing accommodation for native crews in vessels trading with European ports. In warm weather they bathe on the open deck, but this practice must, in Dr. Macleod's opinion, cause much sickness and suffering in a cold climate. The list of such vessels which the Health Officer is preparing will be awaited, and the Lieutenant-Governor desires that when submitting it he will describe what arrangements are, in his opinion, necessary for the health of the native crews.

4. The number of European seamen who arrived in port was 19,496 against 20,662 in the year before, but the daily average population was 1,679 against 1,629 in 1889. Including deaths out of hospitals, the death-rates per mille of the past five years were as follows:—

		Cholera.	Other causes.	Total.
1886	...	11.61	33.53	45.14
1887	...	10.03	16.91	26.94
1888	...	10.59	27.15	37.74
1889	...	11.07	20.29	31.36
1890	..	8.33	15.49	23.82

5. The number of admissions into hospitals and deaths from different diseases during the five years ending with 1890 are shown in the table below:—

		1886.		1887.		1888.		1889.		1890.	
		Admissions.	Deaths.	Admissions.	Deaths.	Admissions.	Deaths.	Admissions.	Deaths.	Admissions.	Deaths.

Sunstroke	...	4	1	5	1	19	5	6	1	4	1
Other diseases	...	1,875	31	1,201	11	1,182	21	1,267	17	1,066	19
Total	...	2,714	71	1,719	35	1,575	49	1,816	43	1,419	38

The total number of natural deaths fell from 51 in 1889 to 40 during the year under review. Of these 38 occurred in hospital and two out of hospital.

The number of cholera cases was much lower than in the previous years, but out of 15 cases 14 proved fatal. The death-rate (8.33) per mille calculated on the daily average population was lower than that of the previous nine years, except 1885, when it fell to 4.13, and was lower than the quinquennial mean (9.28).

No case of small-pox was admitted during the year, and there has been no death from this disease since 1881.

There were three cases of scurvy admitted into hospital, of which two were mild; the third was that of a man who had been suffering from the disease for 8 months prior to his admission.

There were three deaths from sunstroke during the year. Of these one occurred in hospital and two on board ships in the port. Since the close of the year rules have been made under the Indian Ports Act, 1889, for regulating the employment of persons engaged in cleaning or painting vessels or in working in the bilges, boilers or double bottoms of vessels lying in the port. It is hoped that these rules will reduce the number of cases of sunstroke occurring amongst seamen.

The number of deaths from drowning was 14 against 15 in the preceding year.

6. The following table exhibits the admissions into hospital since 1883 of European seamen suffering from venereal diseases:—

			Total admissions.	Rate per thousand.
1883	...	...	237	127·4
1884	...	...	184	109·2
1885	...	...	170	100·4
1886	...	...	417	179·2
1887	...	...	228	120·4
1888	...	...	183	121·1
1889	...	...	186	114·3
1890	...	...	248	147·7

The number of admissions and the rate per mille were higher than those of the previous seven years, except 1886, when the figures were exceptionally high. The Health Officer brings to notice that the experience of commanders of vessels is that cases of this kind have increased since the repeal of the Contagious Diseases Act, but the evidence available is insufficient for the purpose of arriving at a just conclusion.

7. There were 32 deaths at sea against 36 in the previous year.

8. The mortality from all causes among the native floating population is shown in the following statement, the averages being calculated as in the preceding years on a population of 25,000:—

Sickness and mortality among the native floating population.

			Total deaths.		Ratio per mille.	
			1890.	1889.	1890.	1889.
Cholera	...	...	55	80	2·14	3·2
Bowel-complaints	...	...	3	9	·11	·36
Fever, malarious	...	...	8	5	·31	·2
Do., simple	...	...	20	8	·78	·32
Other causes	...	...	31	27	1·20	1·08
Total			117	129	4·54	5·16

Of the 117 deaths that were reported during the year, only 30 occurred in hospital. This is attributed to the unwillingness of natives to go to hospital for treatment. The accuracy of the figures, however, as observed in the Resolution on the Annual Report of the Health Officer for the year 1889, cannot be relied on.

9. Twenty-eight deaths are reported to have occurred amongst lascars at sea during the year against 13 in 1889. Two of these occurred on coasting vessels, and the remaining 26 on foreign-going ships against 2 and 11, respectively, in the year before. The rates were ·36 and 3·37 per mille against ·5 and 1·81 in the preceding year, and calculated on the total population, the death-rate was 2·12 against 1·29 per mille.

10. The S.S. *Sultan* arrived in the port twice during the year with pilgrims from Jeddah, and on each occasion there was small-pox on board.

Pilgrims

11. The general improvement in the conservancy of the foreshore of the river, noticed in the Resolution on the Annual Report of the Health Officer for the year 1889, continued during the year. The drain at King's Road, Howrah, is reported to be in the same state, and the Sanitary Commissioner for Bengal observes that the nuisance will continue to some extent until the drainage of the town is diverted away from the river in a westerly direction. As observed in that Resolution, it is desirable, in the interests of the shipping as well as in the general interests of sanitation, that the town of Howrah should have a proper system of drainage, and the matter will be brought to the notice of the Municipal Department of this Government.

The Health Officer reports that to prevent the pollution of the river it was settled, in consultation with the Municipal authorities at Howrah, that the drain which runs by the side of the latrine in Messrs. Ahmuty and Company's Factory should be bridged. It should be reported whether this work has now been carried out.

The outflow of liquid sewage from Fort William into the river still continues. The scheme for the discharge of the Fort sewage into the Calcutta sewers, which was prepared at the request of the Military Department of the Government of India, is under the consideration of that Government.

Dr. Macleod in his report has again referred to the insanitary condition of a brick-field at Ghosery. Since, however, the report was written, the Municipal Commissioners of Bally, within whose jurisdiction the brick-field is situated, have taken steps to put a stop to the nuisance.

12. There was an increase in the number of corpses found floating in the river, accompanied, however, by a satisfactory decrease in the number of carcasses of animals.

13. No complaint was made during the year about the supply of municipal filtered water to the European shipping. The crews of the steam-tugs plying in the port were not supplied with filtered water; but on the matter being brought to the notice of the owners of the vessels, steps were taken by them to provide hydrant water for their crews.

14. The Health Officer has submitted the usual statement showing the comparative statistics of Port and comparative mortality in the Town and Port of Calcutta for the past three years. The circumstances are so different, however, that any analysis of the figures for purposes of comparison would be useless.

15. The Lieutenant-Governor endorses the commendation bestowed on Dr. Macleod by the Sanitary Commissioner. His Honour is pleased to learn that the Sanitary Inspector, Babu Nando Lal Haldar, continued to discharge his duties satisfactorily.

C. W. ODLING,

*Offg. Joint-Secretary to the Govt. of Bengal.*

No. 128Mne., dated Calcutta, the 12th May 1891.

THE following report of the 16th quarterly inspection of the Dock Works at Kidderpore, which are being carried out by the Commissioners of the Port of Calcutta, is published for general information.

By order of the Lieutenant-Governor of Bengal,

W. B. BESTIC,

*Under-Secy. to the Govt. of Bengal, P. W. Dept.*

#### QUARTERLY INSPECTION OF THE KIDDERPORE DOCK WORKS.

Dated Calcutta, the 29th April 1891.

From—LIEUT.-COL. A. D. McARTHUR, R.E., and H. N. C. CLOETE, Esq.,

To—The Secretary to the Government of Bengal, Public Works Department.

WE have the honour to report that, in accordance with the orders of the Government of Bengal received with the Under-Secretary's letter No. 1054M. of the 21st instant, we made the sixteenth quarterly inspection of the Kidderpore Dock Works on the 27th idem.

The usual tabular statement and the index plan showing the work done during the quarter ending 31st March 1891, and the total amount of work executed from the commencement, which have been prepared by the Superintendent of the Dock Works, are already with Government. The present state of the various works are reported in the following paragraphs:—

*Sixty feet Lock.*—This work is now completed. Against an estimated quantity of masonry, viz., 2,229,490 cubic feet, the aggregate quantity executed up to end of the quarter under review was 2,252,896 cubic feet. 1·6 per cent. of excavation and 2·9 per cent. of masonry were done during the quarter. The wooden jetties at the head of the lock are approaching completion, and the entrance to the lock is being dredged.

*Eighty feet entrance.*—This work is also completed. 715,000 cubic feet of masonry executed up to end of last quarter against an estimated quantity of 711,071 cubic feet. 6·3 per cent. of earthwork was excavated during the quarter. The entrance to the lock has to be dredged. The jetty heads are well in hand.

*Double entrance to Dock No. 1.*—Is completed as previously reported.

*Tidal basin.*—The coping of the quay walls of which a portion only remained has been completed. Against an estimated quantity of 23,601,352 cubic feet of earthwork, only 19,291,148 cubic feet has been executed, leaving about 18·3 per cent. of excavation still to be done, which will be executed by dredging. It is reported that this work will be taken up very soon. About 9·9 per cent. of excavation and 1·9 per cent. of masonry were done.

*Graving Dock.*—As reported last quarter this work is finished; pumping engines have been erected, and the engine house is under construction, satisfactory progress having been made.

*Government Graving Dock.*—Is completed.

*Dock No. 1.*—The additional works rendered necessary by the slips reported during the quarter ending 30th September 1890 have been taken in hand, and are now being carried out in the manner recommended by the Committee. About 8·7 per cent. of excavation still remains, which will be carried out by dredging.

*Boat Canal.*—The lift lock is finished; the lock and supply sluice at Chetla is also complete, with the exception of the gates and over-bridge which are in course of erection. Also some revetments remain to be done. The two road bridges are now open to traffic, and the foot bridge across the lift lock at the Budge-Budge road is in hand. The canal is finished, with the exception of the removal of the cross dams. The excavation of the canal down the centre of site of Dock No. 2 has been taken in hand.

*Subsidiary works.*—As reported during the last quarter, the hydraulic engine station is finished, and an addition is being made for the accommodation of the electric light plant, most of which has been received from England.

The main pumping station is completed. No progress has been made with the iron work of the cargo sheds, owing to, it is reported, materials not having yet arrived from England. Work will be put in hand as soon as they are received.

*Expenditure.*—The total expenditure up to end of the quarter under review is reported to be Rs. 2,15,56,575-13-8, of which Rs. 1,89,97,841-8-6 represents outlay on works and Rs. 25,58,734 is on account of land.

*Sanitary.*—During the quarter under review, the health of the workpeople was fair. The daily average number of workmen employed was 4,784, among whom there were 99 deaths during the quarter, thus showing a death rate of 24·39 per mille per annum.

*General Remarks.*—We consider that the progress on the works in hand during the quarter under review has been very satisfactory, and that, so far as we could judge, the quality of work was all that could be desired.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS  
TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS  
TAKEN IN ASSAM, FOR THE MONTH OF APRIL 1891.

*Meteorology of the month.*—Quite at the close of March, after a long period of unsettled conditions with frequent rain and unusually low temperature, weather had become fine and settled and of the usual hot weather character. For about the first twenty days of April there was no material alteration in the meteorological conditions beyond the rapid increase of temperature which took place at the commencement of the month, by which the defect which had obtained previously was rapidly neutralized. Winds generally remained south-westerly and westerly in most districts, except in the extreme east of the province of Bengal, where southerly and south-easterly winds were blowing. Pressure oscillated from day to day by small or moderate amounts, but during this period no barometric depressions of any kind were formed in Bengal or passed into the province from Northern India. Humidity generally remained moderate, and the sky was only lightly to moderately clouded, and there was an almost complete absence of storms; so that rainfall for the first three weeks of April was confined to a few light and local showers of no practical importance, which fell principally in East Bengal.

On the 20th April pressure fell slowly, but the changes being largest in the west of the province, a shallow low-pressure area began to form there, and this at once commenced to influence the weather. On this day, however, the influence was seen only in the changing wind directions, westerly winds blowing in the western districts, while in the eastern half of the province south or south-east winds prevailed. By the following day a regular cyclonic circulation was established round a shallow low-pressure area over the central districts, due to a brisk fall of pressure, and storms began at the extreme eastern stations. Rainfall was almost general in the Dacca and Tipperah districts and scattered in Chittagong, Furreedpore, and Mymensing. The area of lowest pressure was more to the west on the 22nd over part of South Behar and the adjacent part of Chutia Nagpur; so that easterly winds prevailed except in Orissa and parts of South-West Bengal and Chutia Nagpur. The rainfall area extended northwards, light showers being reported from the Darjeeling and Julpigorce districts. On the evening of the 22nd a violent hailstorm visited Jessore which lasted an hour, causing considerable damage to property. Though there was little change on the 23rd either in the pressure distribution or wind circulation, rainfall was much more local, and no storms of importance occurred. In Mymensingh and North Bengal no rain fell, and in East Bengal only a few light showers were reported; but on the two following days, owing probably to the eastward motion of the depression, rain again became much more general, and heavy showers were reported from many of the East and North Bengal stations. The disturbed conditions continued practically up to the close of the month. Up to the 27th the local storms with rainfall were confined almost entirely to the eastern districts, but from the 27th to the 29th storms with rain occurred over almost the whole province, though the rain was usually light in the central and western districts, while the rainfall in East Bengal was more heavy and general. Quite towards the end of the month a high pressure area developed over the head of the Bay and Lower Bengal, when the winds fell off in force and became more westerly in Behar. The disturbed conditions then began to disappear, and rainfall practically entirely ceased in Orissa, Behar, and Chutia Nagpur, while in South-West Bengal showers became less numerous and lighter, though up to the close of the month showers accompanying local storms were very numerous in East and North Bengal.

*Pressure*—Was decidedly above the normal at the end of March, but early in April a fall set in, and by the 3rd or 4th it became below the normal. A rise then set in, and from the 4th to the 11th of April the mean pressure was in excess by from four to six hundredths of an inch; it then again became below the normal, but a brisk rise set in on the 15th, and by the 18th pressure was about a twentieth of an inch in excess. For the period from the 19th to the 25th, the mean pressure was almost normal, the variations only being equal to a few thousandths of an inch, after which a steady rise set in, and pressure was above the normal until the close of the month. For the whole month, therefore, the mean pressure has been above the normal, the excess generally equalling about two or three hundredths of an inch. This excess pressure is fairly equally distributed over the whole of Bengal, but in Assam the general pressure appears to have been almost normal.

*Temperature*—Was rather largely below the normal at the commencement of the month, and for the week ending April 4th, there was an average defect in the mean temperature of 4.1. In the period from the 5th to the 11th of April for the first time for many weeks the mean temperature had become above the normal for the period, but the excess only averaged seven-tenths of a degree. In the period 12th to the 18th the mean temperature had become from 2° to 3° above the normal. With the rainfall which accompanied the unsettled conditions which commenced about the 20th, temperature fell decidedly, and the mean temperatures became very nearly normal for the period and remained so up till almost the close of the month in all districts except East Bengal, where, owing to the number of storms and the heavier rainfall, temperature became rather below the normal. For the whole month, therefore, the variations of the temperature from the normal have been comparatively small, and in no case do they exceed half a degree. The mean temperature has thus been very slightly in excess of the normal in Orissa, East and North Bengal, South Behar, and Assam, and very slightly below it in South-West Bengal, North Behar and Chutia Nagpur, and practically the mean temperature for the whole province has been normal.

/

*Rainfall.*—Practically the whole of the rainfall for the month fell after the 20th and 21st. The falls have been largest in East Bengal, where an average amount of 5·18 inches was received, which is almost 30 per cent. in excess of the normal amount. In all other divisions the falls have been less than the normal amounts. North Bengal has received an average fall of 1·89 inches or about two-thirds the normal. South-West Bengal has received an average of one inch, or only half the usual fall. In Orissa the fall has equalled about half an inch or two-fifths the normal, while in Behar and Chutia Nagpur the falls have only averaged between one and two-tenths of an inch, and generally they only equal about a fourth of the normal fall. The number of rainy days during the month has also been largely below the normal in all divisions, except East Bengal.

In Assam decidedly heavy rain has been falling during the month, and Sibsagar has received 10·01 inches, Silchar 8·42 inches, and Dhubri 5·47 inches.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the month of April 1891:—

\* Mean of 6 days.

**Explanation.—Summary.**—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period for the last 10 years. The humidity of the atmosphere is expressed at percentage, saturated air being presented by 100. A clear sky is denoted by 0 and an overcast sky by 10. The numbers are the numerical means or average of the rainfall in that district determined from the returns sent in by the sub-divisional station for the period in question during the past stations in the district sending in returns divided by the number of stations. A rainy day is one on which at least a tenth of an inch fell.

for the week ending Saturday, the 9th of May 1891.

Explanation.—..... indicate that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any the returns are wanting, the corresponding long spaces in the total rainfall columns are left blank. With reference to the column of rainy days, the definition of a rainy day is when at least 0.1 inch of rain has fallen.

CALCUTTA, the 12th May 1891.

**SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS  
TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVA-  
TIONS TAKEN IN ASSAM, FOR THE WEEK ENDING SATURDAY,  
THE 9TH OF MAY 1891.**

CONDITIONS had been distinctly disturbed in North, East, and parts of South-West Bengal and Orissa for a considerable part of the previous week, and practically the same conditions have obtained almost throughout the present week. On the 3rd pressure fell briskly over the whole province, while temperature had risen by amounts of from  $1^{\circ}$  to  $3^{\circ}$ . Winds were rather more easterly than usual, and wind force was decidedly lower than it had been. On this day the local storms with rain were mainly confined to South-East and North Bengal, the remainder of the province being practically rainless. On the 4th pressure had again fallen briskly over the whole province, the fall generally equalling about six hundredths of an inch. Temperature had also risen in all districts, the increase varying from one to three degrees. Winds on this day had become much more southerly than they had been, but the local storms were comparatively few in number, except in North Bengal and in parts of East Bengal and Orissa, from which districts many stations reported moderately heavy rain on the morning of the 5th. The fall of pressure and the rise of temperature had practically ceased on the 5th, but winds again became strongly easterly, while wind velocities at the inland stations commenced to increase. Rather numerous local storms with rain occurred on the evening of the 5th in East and North Bengal and in parts of South-West Bengal; Kushtia on the morning of the 6th reporting 2.65 inches of rain and Cox's Bazar 2.13 inches, while falls exceeding an inch were recorded at Choondanga, Lalgola, Joydebpore, Pubna, Natore, Alipore Doar, and Bhagatpore. On the 6th pressure had commenced to rise slowly, and the distribution was practically normal, while temperature had risen and was above the normal by from  $4^{\circ}$  to  $7^{\circ}$  in all districts except in the south east corner of the province. Winds continued strongly easterly, and their velocities had increased, and on this day rather strong winds were blowing in the north-west angle of the Bay. Again a few local storms with rain occurred in East, North, and South-West Bengal, but the falls were generally not large. On the 7th pressure and temperature continued to rise by small amounts, wind directions remained unchanged, while velocities again increased at the head of the Bay and in Lower Bengal, and winds became decidedly strong. Scattered showers again occurred, which were most numerous in East Bengal. On the 8th pressure began to fall briskly in all districts except the west of the province, and a very shallow depression formed in the north of South-West Bengal, while temperature also commenced to fall on this day. The wind circulation was not quite so strongly easterly in Lower Bengal, but elsewhere it was unchanged, and winds continued of considerable strength. On this day, however, the number of local storms which occurred was very small, and only very few stations received rain. On the 9th pressure continued to fall slowly, and the shallow low pressure formed on the 8th still existed over parts of South-West Bengal. Winds remained almost unchanged in direction and velocity, while temperature fell by about  $3^{\circ}$  in the east of the province and rose elsewhere. Again showers occurred on this day, of which reports were received on the 10th, the local storms with rain being numerous in East, North and South-West Bengal, North Behar and Assam, while Orissa, Chutia Nagpur, and South Behar were practically rainless. It will thus be seen that conditions have been generally disturbed with occasional rain showers almost throughout the week in East, North and South-West Bengal and in Orissa, while fine weather with an almost entire absence of rain has prevailed in Behar and Chutia Nagpur.

**Pressure.**—The mean pressure for the week has been nearly normal, though the slight variations in different districts have been irregular both in character and amount. Pressure has been generally slightly below the normal in Behar and South-West Bengal, while it has been above it elsewhere, but the variations as a rule do not average more than a hundredth of an inch.

**Temperature.**—As previously stated, temperature has generally been in excess of the normal, and the mean for the week shows an excess amount for the whole province of Bengal of two and-a-half degrees. The largest excess has been registered in South-West Bengal, where it has equalled  $4.4^{\circ}$ , and in Chutia Nagpur, where it has been  $3.9^{\circ}$ . In North Bengal temperature has been almost normal, while in Assam a defect of  $1^{\circ}$  has been registered.

**Rainfall.**—Notwithstanding the frequent rainfall during the week, the amounts which have been received have been in all cases below the normal. East Bengal has received an average fall of 1.62 inches, or about an inch less than usual for the period. North Bengal has received an average fall of 1.21 inches, which is about three fourths the usual fall. Orissa has received half an inch, or half the usual fall, and South-West Bengal also about half an inch which, however, only equals about a third of the normal amount. Behar and Chutia Nagpur, as above stated, have been practically rainless. In Assam, Sibsagar has received 3.25 inches, Dhubri 3.07 inches, and Silchar 2.57 inches, during the week.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Saturday, the 9th of May 1891 :—

The results of observations at the Alipore Observatory are not rigorously comparable with the registers of past years (at the Park Street Observatory). The barometer is about 3 feet higher at Alipore, and, other things being equal, reads therefore .003 lower. The diurnal range of temperature is also greater at Alipore, and the mean temperature apparently about 0.2° lower; and finally, the thermometer which furnished the record of temperature at the Surveyor-General's Office during 20 years and upwards is found to read 0.6 higher than the Kew standard thermometer, which is the standard of reference at the present Observatory.

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

MEMORANDUM.

Weekly statistics of births and deaths in twenty-seven of the principal towns of Bengal for the week ending with Saturday, the 25th April 1891.

BIRTHS.

THE total births registered during the week ending with Saturday, the 25th April 1891, in twenty-seven principal towns of Bengal, amounted to 406, and correspond to an annual rate of 19·7 per 1,000 of the aggregate population of those towns, which is 1,072,359. This rate is 1·2 higher than the average rate of the corresponding week of the past five years, and is also higher than the rate of the corresponding week of any of the past five years except 1889, *vide* the figures below—

## APPEALS FROM ORIGINAL DECREES.

I. Every petition of appeal shall be presented in the High Court to the Deputy Registrar, by the appellant in person, or by his recognized agent, or by a pleader appointed under the provisions of Section 39 of the Code of Civil Procedure, or by some person appointed in writing in each case by such pleader to present the same.

II. The Memorandum of Appeal shall be drawn up in the manner prescribed by Section 541 of the Code of Civil Procedure, and it shall be the duty of the Deputy Registrar to endorse thereon the date of presentation and to satisfy himself that the appeal is in proper form, that the fees\* chargeable thereon have been paid, and that the appeal has been preferred within the period of limitation.

Where all these particulars have been correctly observed, the Deputy Registrar shall admit the appeal and register it in the Register of Appeals from Original Decrees.

III. In any case in which an appeal has been returned for amendment under Section 543 of the Code of Civil Procedure, it shall be the duty of the Deputy Registrar to attest the amendment by his signature.

IV. If the Memorandum of Appeal be not in the correct form, the Deputy Registrar shall return the petition of appeal with an endorsement thereon of his objection, recording the fact in a book to be kept for the purpose.

V. In a matter dealt with under Rule IV the appellant or his pleader may present the appeal to the Division Bench hearing appeals from the Group to which the appeal belongs.

VI. After an appeal has been registered, it shall be the duty of the Deputy Registrar to send a notice of the appeal without delay to the Lower Court from whose decision the appeal is preferred, and to call for the transmission, ordinarily within seven days, of the record and all material papers.

Whenever it shall be impossible for the Lower Court to comply with the requisition within the time stated, such Court shall report the reason of its inability and shall ask for such further time as may be necessary.

VII. The fee for the issue of the notice to the Respondent under Section 553 of the Code of Civil Procedure shall be paid into Court by the appellant in the manner prescribed in the Rules issued by the High Court under Clause 1 of Section 20 of the Court Fees Act, VII of 1870, and on receipt thereof it shall be the duty of the Deputy Registrar to transmit the notice to the Lower Court for service, together with the notice required by the preceding Rule.

VIII. IX. The Lower Courts shall issue all notices received for service immediately on receipt thereof, and in their returns of service shall, in every instance, insert the date of receipt by them of the notice, the date on which it was made over to the serving officer, and the date on which it was received back from him.

Every return of service or of failure to serve the notice shall be accompanied by the affidavit or solemn declaration of the serving officer, specifying the fact and mode of service or the reason why service could not be effected in any of the modes allowed by law. It shall be the duty of the Lower Court to cause the notice to be served in sufficient time before the date fixed, and if such service be impracticable to state the reasons for which service cannot be effected, and thereupon a fresh date shall be fixed by the High Court. In every case the Court making the return shall satisfy itself that a valid service has been made, or that there has been a failure of service, and shall certify such opinion to the High Court, with the reasons in case of failure of service.

XI. XII. The date to be fixed for the hearing of the appeal shall be the 28th day after the date on which the time for the service of the notices expires, provided that such a day be not a Sunday or holiday, in which case the first business day afterwards shall be the day of hearing.

XIII. If there be several Respondents to be served, and they do not all reside in the same district, the time for service of the notices and for hearing shall be fixed with reference to that district for which the longest time is allowed in the Table in Rule XV.

XIV. In every instance in which it shall appear that the Respondent, or any one of the Respondents, to be served resides in any district other than that from which the appeal comes, the Deputy Registrar, in fixing the time for service and for the hearing of the appeal, shall add a sufficient time for sending the notice from the district from which the appeal

*Rules for the preparation of Paper-books.*

XVII. The preparation of Paper-books in Appeals to the High Court from Original Decrees shall be regulated by the following Rules :—

Provided that the Division Bench having jurisdiction over any particular Group may for sufficient cause shown pass any special order regarding the preparation of the Paper-book of any particular appeal belonging to that Group.

1. Every party, who files an appeal in person, shall insert in his petition of appeal, or

Address by person filing appeal in person. otherwise give in writing to the Deputy Registrar, an address within the town of Calcutta or the Municipality of the Suburbs of Calcutta or that of Howrah, at which notices and other process in the appeal may be served upon him; and any notice or other process left for him at such address or sent thereto by registered letter shall be presumed to have been duly served upon such party.

2. Upon receipt of the Record the Deputy Registrar shall serve a notice upon the

Appellant, requiring him to prepare and deliver to such Deputy Registrar a List of the papers to be inserted in the Paper-book at the expense of such Appellant. Such List shall be in the following form :—

Number on the record.	Mark (if any) in the Court below.	Description and date of Paper.	Whether the whole or portion, and (in case of a portion) what portion to be inserted in the Paper-book.	Page of Paper-book (to be filled in after).

What papers to be entered in the List.

3. There shall be entered in such List all papers on which the decision of the appeal depends.

(1) The following papers shall be translated and printed in every case, and it shall be unnecessary to enter any of them in the List, viz.—

- (a) The Plaint exclusive of Schedules ;
- (b) Written Statements of parties ;
- (c) Issues ;
- (d) The Judgment and the Decree or Order against which the appeal is preferred ;
- (e) The Grounds of Appeal.

(2) It shall ordinarily be unnecessary to enter in the List any of the following papers viz.—

- (a) Schedules ;
- (b) Maps and plans in all cases other than *Chur* Partition and Boundary cases ;
- (c) Accounts, *Jama-wasil-baki* and similar papers, except particular entries relevant for the decision of the appeal ;

- (e) Receipts, *Chalauns*.

But any such paper shall be entered if a reference thereto is necessary in order to the decision of the appeal.

4. The Appellant shall, within thirty\* days after service of the notice required by Rule 2, deliver to the Deputy Registrar a List prepared in accordance with Rules 2 and 3 of the papers to be inserted in the Paper-book at his expense. Such List shall be termed "The Appellant's List."

5. As soon as such List is delivered to the Deputy Registrar, he shall, if the Respondent has appeared, give notice of such delivery to such Respondent.

6. Every Respondent who has entered an appearance shall be entitled to inspect the Appellant's List, and at his own expense to obtain a copy of the whole or any portion thereof.

Respondent may inspect and take copy of List.

7. Every such Respondent shall, within thirty\* days after service upon him of the notice required by Rule 5, deliver to the Deputy Registrar a List in duplicate, in the form in Rule 2, of the papers other than those inserted in the Appellant's List to which such Respondent desires that reference shall be made by the Court at the hearing of the appeal, and which shall be inserted in the Paper-book at such Respondent's expense. Such List shall be termed "The Respondent's List." When the Respondent intends to take any objection to the decree, which he could have taken by way of appeal, and the taking of which is subject to the proviso contained in section 561 of the Code of Civil Procedure, any papers relevant to maintain this objection shall be included in such Respondent's List.

8. If the Respondent considers that any paper or portion of a paper, which ought to have been inserted in the Appellant's List of papers under the provisions of Rule 3, has been omitted therefrom in violation of these provisions, he may, within fourteen days after service upon him of the notice required by Rule 5, and after giving notice to the Appellant of his intended application, apply to the Court for an order that such paper or portion of a paper be inserted in the List of such Appellant. When the Respondent, though he has not appealed against any part of the decree, intends to support such decree on any of the grounds decided against him in the Court below (section 561 of the Code of Civil Procedure), he is entitled to have included in the Appellant's List any papers relevant to such ground.

9. If the Respondent do not enter an appearance or do not deliver the List in duplicate directed by, and within the time prescribed by, Rule 7, and if no order be made under Rule 8, the Paper-book shall be prepared in accordance with the Appellant's List.

On Respondent's default Paper-book to be prepared according to Appellant's List.

10. When two or more Appellants or Respondents have the same interest in the appeal, one List only shall be required from all such Appellants or Respondents. Appellants or Respondents having separate interests shall deliver separate Lists. In such cases the principle of Rule 16 shall apply.

One List only to be delivered by two or more Appellants or Respondents having same interest.

11. If any of the papers, which must be inserted in the Appellant's List or in the Respondent's List was previously printed in a former Paper-book, the fact of its having been so printed may be stated in the List in which such paper is inserted. But such papers shall nevertheless be printed, unless the Court otherwise direct.

Paper printed in former Paper-book to be printed unless ordered to the contrary.

12. No paper in the record of the case which is not inserted in the Appellant's or Respondent's List and printed in the Paper-book, shall be referred to at the hearing of the appeal without the special leave of the Court. But this rule shall not preclude the Court from referring to any paper to which it considers a reference necessary for the ends of justice.

Papers not inserted in the Paper-book may not ordinarily be referred to at the hearing of the appeal.

\* See Rule 31.

13. The Deputy Registrar shall, within twenty-one\* days after the delivery by the Appellant and the Respondent of their Lists respectively, make and deliver to such Appellant and to such Respondent separate Estimates of the cost of preparing their portions of the Paper-book. Such Estimates shall state separately the cost of transcribing, translating, examining, printing, &c., at the following rates, viz.—

"editing" includes (a) arranging the papers for press ; (b) preparing the *Table of Contents* required by the Rules ; (c) examining and comparing *proofs* with "*copy*," such "*copy*" being the originals or authenticated copies of English papers, or translations where the Rules provide for translations : and the Editor is responsible that all the papers in the lists are accurately and completely produced in the Paper-book :

Notice of such election shall be given to the Deputy Registrar by the Appellant within twenty-one\* days after delivery to him of the estimate prepared in accordance with Rule 13. The Deputy Registrar shall thereupon make over one of the Respondent's duplicate Lists to the Appellant's Vakeel, giving the Respondent notice thereof.

15. The Appellant, save as hereinafter provided, and the Respondent in every case, shall within thirty\* days after the delivery to them respectively of the Estimates prepared in accordance with Rule 13, deposit with the Accountant of the Court the full amount of their respective Estimates. If it subsequently appear that the amount so deposited by either party to the appeal is insufficient to defray the cost of preparing his portion of the Paper-book, the Deputy Registrar shall estimate the additional amount required and shall give notice thereof to such party. Such additional amount shall be deposited by such party with the Accountant of the Court within twenty-one days after service upon him of such notice. When the Appellant elects under Rule 14 to have the Paper-book prepared in the office of his Vakeel or by a retired officer of the Court specially authorized, it shall not be necessary for him to deposit the amount of his estimate, other than the cost of the Examination of translations, with the Accountant of the Court, and he may make his own arrangement with such Vakeel, or such officer, for payment of the cost of preparing the Paper-book.

Appellant may pay out of Court, when he elects to have Paper-book prepared in his Vakeel's office or by a retired officer of the Court.

16. When separate appeals have been preferred by different persons against the same decree, complete Lists shall be delivered by the parties to each such appeal : but the Deputy Registrar may, subject to the order of the Court, apportion between the parties concerned the cost of preparation in respect of any matter common to all or any of such parties. Printed copies of such common matter may be included in the Paper-book of each appeal ; or such matter may appear in one Paper-book only, the other Paper books containing references to the pages of such Paper-book in which such matter appears. This rule shall apply also when two or more separate appeals are preferred in analogous cases.

17. If the Appellant fail to deliver his List of papers in accordance with Rule 4, or if the Appellant or Respondent fail to make the deposit or additional deposit required by Rule 15, the Deputy Registrar shall cause the appeal to be set down for hearing by the Division Court having jurisdiction in respect thereof ; and such Court may, unless satisfied that there was reasonable ground for the default—in the case of default by the Appellant, direct the appeal to be dismissed for want of prosecution—and in the case of default by the Respondent, direct that the Paper-book be prepared in accordance with the Appellant's List, excluding the papers of the Respondent's List ; or may pass such other order as may seem proper under the circumstances of the case.

1. Every application to the High Court shall be in writing, and if founded on any statement of fact, shall set out the material facts, matters and circumstances on which the applicant relies.
2. Every such petition shall be neatly and legibly written on paper of foolscap size with a margin of two inches, and shall contain about 20 lines in each full page. The petition shall be divided into paragraphs and numbered consecutively.
3. The facts stated in such petition shall be verified by the solemn affirmation of the petitioner, or by an affidavit to be annexed to the petition.

*Note.*—The affidavit may be by any person having cognizance of the facts stated. Several persons may join in an affidavit, each deposing separately to those facts which are within his own knowledge.

4. It will not be necessary to set out in the petition or in the affidavit any document which is part of a record, present in the High Court, nor will it be necessary to produce any affidavit of any facts found, in the course of the suit or proceeding out of which the appeal arises, by the High Court or any of the Lower Courts, provided that such finding has not been reversed on appeal: but the petition shall state shortly all facts upon which it is intended to rely and shall give the number, letter, title or other description of all documents on the record, present in the High Court, to which it is intended to refer.
5. When the applicant desires that any documents in a record, present in the High Court, shall be produced at the hearing in order that they may be referred to by the Court, he shall, before half past ten in the forenoon of the day on which such documents are required, give notice to produce them to the officer of the High Court in charge of the record. Unless by a special order of the Court, documents will not be produced from the record room during the sitting of the Court.
6. In all cases in which service of notice on the opposite party is necessary, if such notice has not been duly served, the hearing of the application (except in cases of urgency), shall be postponed, unless the parties entitled to notice are present and willing to proceed at once. In all cases the parties opposing the application shall be at liberty to apply for a postponement in order to answer the affidavits or for any other good and special cause.
7. Any party opposing the grant of an application, or showing cause against a rule, who may desire to bring before the Court any facts not contained in, or admitted by, the petition or affidavit of the opposite party, shall do so by an affidavit containing, in the form of a narrative, the material facts on which he relies.
8. No affidavits in answer shall ordinarily be read which have not been filed with the proper officer of the Court 24 hours before the sitting of the Court on the date fixed for the hearing of the applications.

*Affidavits.*

II. The following rules shall apply to all affidavits filed in the High Court:—

4. Every affidavit containing any statement of fact shall be divided into paragraphs, and every paragraph shall be numbered consecutively, and, as nearly as may be, shall be confined to a distinct portion of the subject.
5. Every person, other than a plaintiff or defendant in a suit in which the application is made, making any affidavit, shall be described in such a manner as will serve to identify him clearly, that is to say, by the statement of his full name, the name of his father, his profession or trade, and the place of his residence.
6. When the declarant in any affidavit speaks to any fact within his own knowledge, he shall do so directly and positively, using the words "I affirm" (or "make oath") "and say."
7. When the particular fact is not within the declarant's own knowledge, but is stated from information obtained from others, the declarant shall use the expression "I am informed," and, if such be the case, should add "and verily believe it to be true," or he may state the source from which he received such information. When the statement rests on facts disclosed in documents or copies of documents procured from any Court of Justice or other source, the deponent shall state what is the source from which they were procured, and this information, or belief, as to the truth of the facts disclosed in such documents.
8. Every person making an affidavit, if not personally known to the Commissioner, shall be identified to the Commissioner by some person known to him, and the Commissioner shall specify at the foot of the petition, or of the affidavit (as the case may be), the name and description of him by whom the identification is made, as well as the time and place of the identification, and of the making of the affidavit.
9. If any person making an affidavit shall be ignorant of the language in which it is written, or shall appear to the Commissioner to be illiterate, or not fully to understand the contents of the affidavit, the Commissioner shall cause the affidavit to be read and explained to him in a language which both he and the Commissioner understand, either reading so himself, or causing another person to do so in his presence. When any affidavit is read and explained as herein provided, the Commissioner shall certify in writing at the foot of the affidavit that it has been so read or explained, and that the declarant seemed perfectly to understand the same at the time of making the affidavit.
10. In administering oaths and affirmation to declarants, the Commissioner shall be guided by the provisions of the Oaths Act X of 1878. The following forms are to be used:—

*Affirmation.*

I solemnly declare that this my declaration is true, that it conceals nothing, and that no part of it is false.

## MISCELLANEOUS.

III. Except under the special orders of a Division Bench, no document being an exhibit to an affidavit or verified petition or the materials for any application shall be given back unless the document be an original document, in which case it may be taken back on an order of the Court, a certified copy being retained.

IV. Applications under Chapter XXI of the Code of Civil Procedure shall be made in open Court to the Division Court hearing appeals from the Group to which the case belongs.

V. Applications for leave to appeal *in forma pauperis* shall be presented in open Court to the Division Court hearing appeals from the Group to which the case belongs, in accordance with the provisions of Chapter XLIV of the Code of Civil Procedure.

VI. Every petition of appeal, whether against an Original Decree, or against an Appellate Decree, or against an Order, which may not have been filed within the limited period of 90 days, or accompanied by the copies of the decrees, or of the judgments and decrees, as required by Law, or in respect of which any indulgence is asked, shall be

presented by way of Motion in open Court to the Division Bench taking appeals from the Group to which the appeal belongs, and such Division Bench shall at once proceed to pass thereon such order as the case may require.

VII. When a Vakeel retained to appear and plead for any party to a suit or an appeal is prevented by sickness or engagement in another Court from appearing and conducting the case of his client, he may appoint another Vakeel to appear in his place, so that his client may not be unrepresented at the hearing, but such Vakeel shall not so appear unless he shall have first obtained the special permission of the Division Bench.

VIII. In any case in which the party employing a Vakeel, or his agent, after due notice fails to pay the amount of the estimated costs for preparing briefs containing the papers connected with the case on appeal necessary to enable the Vakeel to conduct the case properly, the Vakeel or Vakeels after notice to such party or his agent, or by leave of the Court, may withdraw from the case.

IX. A Vakeel may also for any other sufficient cause or after such notice to his client as may enable him to appoint another Vakeel, by leave of the Court but not otherwise, and on such terms as the Court may order as to refunding any fees he may have received, withdraw from the further conduct of the case.

X. The Deputy Registrar shall attest all vakalutnamas and Mukhtyarnamas in all cases in the High Court in its Appellate Jurisdiction.

XI. The Deputy Registrar shall bring to the notice of the Division Court any wilful neglect on the part of any Vakeel or Mukhtyar attached to the High Court to attend at his office.

XIII. The Deputy Registrar shall dispose of all returns to orders of the Court in which a reference to the Court for special orders is not required.

XIV. The Deputy Registrar shall see that the proceedings and other processes of the Court are issued without delay, and that reminders and calls for explanation are despatched, whenever the return of the Lower Court is not made within the prescribed period.

XV. The Deputy Registrar shall note any irregularity committed by the Lower Courts in the preparation and endorsement of the decrees of their Courts, and submit his report of such irregularity to the Division Bench.

*The following instructions have been issued to Subordinate Courts in matters connected with Appeals to the High Court.*

NOTE. (1) The records of cases called for by the High Court on appeal from the judgments and orders passed therein shall ordinarily be despatched within seven days from the receipt of the order calling for such records. In the event of any delay occurring in their despatch, a reply should be sent explaining the cause of the delay, and the date on which it is expected that the requisition of the Court will be complied with.

(2) Records of execution cases sent up in appeal to the High Court shall be invariably submitted complete,—that is, all the papers connected with them in the Lower Courts, whether Original or Appellate, should be sent up, so that they may be at hand, in case the Court should find it necessary to refer to them.

(3)\* In Civil cases sent up to the High Court in appeal, in which the preparation of maps may have been necessary for the elucidation of any points of importance, such map should be pasted upon cloth before being despatched with the records. Much inconvenience has been caused at times by the tattered condition in which maps in important cases have come before the Court.

4† District Judges in the Lower Provinces are authorised to transmit by service post the processes issued in all cases appealed either to the High Court or to Her Majesty in Council. It is to be understood that the processes thus issued should not be registered. If registered, they must be prepaid for by stamps.

(5) (a) A covering letter forwarding any Vernacular paper (e.g., Judicial Proceeding, Report of a Subordinate Ministerial Officer, and such like) should never be addressed to the Court.

(b) The transmission of Vernacular papers should be discontinued as much as possible.

(c) No Vernacular paper should be addressed to the Court unless it refers to some Judicial Proceedings before the Court, or is a copy of some proceeding forming part of some Judicial record. In such a case the Vernacular paper should be sent with a short memorandum written on the face of it.

(d) Reports of Subordinate Ministerial Officers are obviously intended only for the Superior Officer to whom they may be addressed, and should never be transmitted to the Court either in original or by copy. If it be necessary to address the Court regarding the subject-matter of any such report, the contents of that report should be embodied in an English letter.

#### GILCHRIST SCHOLARSHIPS TENABLE IN EUROPE BY NATIVES OF INDIA.

[These Scholarships are open to Women upon exactly the same conditions as to Men.]

1. Three Scholarships of the value of £200 per annum will be awarded, one every year, to candidates who are natives of India (within the meaning of Section 6\* of the statute 33 Vic., Cap. 3), or of the "Native States" of India. They shall each be tenable for three years at any University or any Science or Technical College in Europe (approved by the Trustees in each case), on condition that the Scholar shall undertake to go through the course and pass the examinations necessary for obtaining a definite Science degree or diploma as may be prescribed by the Trustees. The nomination to these Scholarships will rest with the Universities of Calcutta, Madras, and Bombay in rotation, subject to the conditions hereinafter specified.

\* The provision in the section is as follows :—"That for the purpose of this Act, the words 'native of India' shall include any person born and domiciled within the dominions of Her Majesty in India, of parents habitually resident in India, and not established there for temporary purposes only; and that it shall be lawful for the Governor General in Council to define and limit from time to time the qualification of natives of India thus expressed."

2. A scholarship will be given every third year on like conditions, the nomination of suitable candidates for which will rest with the Universities of the Punjab and Allahabad jointly. Each of these Universities may submit to the Government of India the name of one candidate, and the actual nomination to the Scholarship shall be made (from the names submitted) by the Government of India.

3. The scholarships will be given (during the next few years) in the following rotation :—

- 1891. Calcutta, Punjab, and Allahabad.
- 1892. Bombay.
- 1893. Madras.
- 1894. Calcutta, Punjab, and Allahabad.
- 1895. Bombay.
- 1896. Madras.

4. Each scholar will be provided by the Government of India with a free passage to England. The Gilchrist Trust will provide a return passage (at the end of the three years) at a cost not exceeding £50, provided that the scholar shall have fulfilled the conditions of his scholarship; but the scholar will not be entitled to claim any difference between the actual cost of passage and the amount above named.

5. Each scholar must enter into a written engagement to submit to such regulations as may from time to time be issued by the Gilchrist Trustees for the guidance of the scholars.

The tenure of the scholarships will be strictly dependent on good conduct in Europe, and on satisfactory progress being made in study. The Gilchrist Trustees reserve to themselves the right of finally deciding whether a scholar has or has not committed a breach of the Rules and Conditions on which his scholarship is held, as also all questions which may from time to time arise, whether expressly provided for in the Rules and Regulations or not. They further reserve to themselves the power of altering the conditions of the scholarships, or of altogether withdrawing them, if they shall think fit. Due notice of any alterations will be given, and changes will not be made in such a manner as to affect the interests of students already appointed to scholarships.

7. One of the Gilchrist Trustees\* will personally see each Gilchrist scholar as soon as possible after he has reported his arrival at the office of the Trustees, and will confer with him upon the course he may propose to pursue, and the University or College to be selected.

#### RULES FOR ELECTION TO THE GILCHRIST SCHOLARSHIPS.

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph and from observations made at 6h, 10h, 16h and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

A clear sky is denoted by 0 and an overcast sky by 10. The max are the numerical means or average of the rainfall in that district determined from the returns sent in by the sub-divisional station for the period in question during past stations in the district sending in returns divided by the number of stations. *Explanation.*—..... indicate that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If the returns are wanting, the corresponding spaces in the total rainfall column are left blank. With reference to the column of rainy days, the definition of a r is when at least 0.1 inch of rain has fallen.

Calcutta, the 19th May 1891.

**SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS  
TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVA-  
TIONS TAKEN IN ASSAM, FOR THE WEEK ENDING SATURDAY,  
THE 16TH OF MAY 1891.**

THE meteorological conditions which had existed during the previous week had been somewhat disturbed, and rather numerous local storms with moderate to heavy rain had occurred in East, North, and South West Bengal and in Assam. During the present week these disturbed conditions have continued, and, if anything, have rather extended in area and intensified, and thus almost general, and in several cases rather heavy rain has been reported on several days during the week; the rainfall in East, North, and South-West Bengal and in North Behar being decidedly abundant and indeed above the normal.

The meteorological changes which have taken place from day to day have been of comparatively little importance. On the 10th instant pressure was increasing, and there was a tendency for low pressure to be produced over Orissa, where pressure was below the normal, while elsewhere over the province it was in excess. Temperature had fallen decidedly, but the general temperature of the province was nearly normal. On the 11th pressure had changed irregularly, a rise of nearly a tenth of an inch having taken place in Orissa, and having thus filled up the low pressure which was previously developing. Elsewhere pressure had generally risen more slowly, except at the northern and north-eastern stations, where there had been a fall. On this day, therefore, pressure was generally above the normal, the excess being largest in the southern and south-western districts. Temperature also had fallen rather rapidly in the southern and south-western districts, while it was rising elsewhere. On the 12th pressure had again fallen, the fall being largest in the western and south-western districts, while temperature had commenced to rise generally. On the 13th pressure had fallen over the whole province, the fall at some of the eastern stations equalling a tenth of an inch, while the fall was very slight at the south-western stations. Temperature had generally risen except in North Bengal, and was considerably above the normal at the western stations, though below it slightly in the centre and east of the province. On the 14th pressure had fallen slowly at the southern and south-western stations, while it had risen elsewhere, and temperature had fallen at the eastern and northern stations and risen in the south and west of the province. It will thus be seen, that for the first five days of the week the meteorological changes as above described were of decidedly variable nature, the pressure changes, for instance, being generally of different nature in different parts of the province, and of opposite character from day to day. During the whole of this time moist south-easterly and easterly winds were blowing over the greater part of the province, and numerous local storms, in most instances accompanied by rain, occurred in almost all divisions of the province; the rainfall, however, being smallest in amount in South Behar and Chutia Nagpur. On the 15th, however, the pressure changes were much more regular, and a general rise of small amount was reported, while on the 16th the pressure changes were exceedingly small, and as a rule not larger than a hundredth of an inch, pointing to the fact that weather conditions were becoming less disturbed. On the 15th, and particularly on the 16th, the number of local storms reported was very much smaller than before, and they were practically entirely absent in Orissa, South-West Bengal, Behar, and Chutia Nagpur on the latter date. With the decrease in the rainfall temperature commenced to rise rapidly at the end of the week, and from the 15th to the 16th a general rise in the mean temperature of about  $3^{\circ}$  was reported. At the close of the week pressure was above the normal by from  $0.03''$  to  $0.08''$ . Temperature was slightly below the normal at some of the stations in North Bengal and Assam, while elsewhere it was in excess by amounts ranging up to  $5^{\circ}$  at the western stations.

*Pressure.*—The mean pressure for the week has been in excess of the normal usually by about  $0.02''$ . This excess is fairly regularly distributed over the whole province.

*Temperature.*—The mean temperature for the week has been almost normal in South-West Bengal, North Behar, and Orissa, it has been below the normal by from one to two and-a-half degrees in East Bengal, Assam, and North Bengal, and above by similar amounts in South Behar and Chutia Nagpur. Taking the opposite variations into account, the mean temperature for the whole of Bengal has only varied from the normal by about a tenth of a degree.

*Rainfall.*—An average rainfall of nearly three inches has been registered in East Bengal, which is more than twice the normal fall. In North Bengal a fall of two and-a-quarter inches has been recorded, or about 60 per cent. in excess of the normal. In South-West Bengal the falls averaged one and-a-half inches, or nearly twice the normal amount. In Orissa and North Bengal an average amount of nearly three quarters of an inch fell, the fall being in distinct excess in North Behar, but of about the usual amount in Orissa. In South Behar the fall averaged a third of an inch, or almost exactly the normal amount, and the only division in which there was anything like a defective fall was Chutia Nagpur, where about a fifth of an inch fell, which is less than half the usual fall for the week. Particularly heavy falls have occurred during the week at the following stations:—Ranaghat, Jungipore (Moorsshedabad), Naraingunge, Moonshigunge, Comilla, Kishoregunge, Panchbibbi, Nattore, and Cooch Behar.

In Assam, Sibsagar for the whole week has received no rain, Silchar has reported 1.92 inches, and Dhubri 3.85 inches.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Saturday, the 16th of May 1891 :—

## MEMORANDUM.

*Monthly statistics of deaths registered in forty-five districts of Bengal for the month of February 1891.*

THE total number of deaths registered during the month of February 1891 in the districts of Bengal amounted to 137,553, against 143,492 in the preceding month, 112,524 in February 1890, and an average of 101,630 in the corresponding months of the previous five years (1886—90). These figures correspond to annual death-rates of 24·96, 26·04, 20·40 and 18·48 per 1,000, respectively, of the aggregate population of those districts, which is 65,859,534. The death-rate of February 1891 is 6·48 higher than the mean rate of the corresponding months of the past five years 1886—90, and is also higher than the rate of the corresponding period of any of the past five years with which comparison is instituted, but compared, with the preceding month, it is 1·08 less, *vide* the figures below :—

Of the total deaths, 72,991 (ratio 26·76 per 1,000) were males and 64,562 (ratio 23·28 per 1,000) females. As usual, the registered results were, on the whole, greater among the male than among the female population. Relatively 115 males died to every 100 females, calculated on the proportion such mortality bears to the total male and female population.

The following table shows the highest proportions of deaths registered during the month of February 1891, arranged in order of sequence and compared with the mortality of the corresponding month of 1890 :—

The mortality of February 1891 under the heads cholera, small-pox, fever and other causes shows an increase over the mortality from these causes of the two past periods with which it is compared.

The total deaths from *cholera* numbered 15,305, against 15,691 in the preceding month. Howrah suffered the most proportionally to population, 10·32 per mille per annum; next 24-Pergunnahs 9·24; then Nuddea 9; Jessore and Dinajpur 6·12 each; Tipperah 5·64; Midnapore 5·52; Dacca 5·28; Purneah 4·80; Burdwan and Rungpore 4·68 each; Khulna 4·44; Bogra and Faridpore 4·20 each; Rajshahye 3·60; Bankura, Hughli and Serampore 3·36 each; Manbhum 3·12; Backerganj and Maimansing 2·28 each; Maldah 2·76; Murshedabad 2·52; Julpaiguri and Balasore 2·40 each, and Birbhum 2·16. In one district, Mozufferpore, no death from cholera was recorded.

*Small-pox* was the cause of death in 1,538 instances, against 1,037 in the month before. Considered with the population, Cuttack suffered the most with a death-rate of 3·24 per 1,000 per annum, then Midnapore with 1·56, followed by Chittagong 1·08. Eight districts were absolutely free from this disease, viz. Birbhum, Khulna, Rajshahye, Rungpore, Pubna, Darjiling, Julpaiguri, and Sonthal Pergunnahs.

*Fevers* caused 95,436 deaths and *diarrhoea* and *dysentery* 3,611, against 99,599 and 3,909, respectively, in the preceding month. All the districts suffered more or less from both

ailments, but Julpaiguri returned the highest fever death-rate, 32·16 per mille per annum, and Howrah the highest rate, 6·24, from diarrhoea and dysentery. Next to Julpaiguri the highest fever death-rates occurred in Serampore 29·04, Midnapore 28·44, Dinajpur 27·96, Darjiling 27·72, Singbhum 27·24, Hughli 26·64, Noakhali 26·52, Rungpore 26·04, Jessore 24·84, Bogra 24·36, Purneah 23·83, Rajshahye 23·76, Chittagong 21·12, Khulna 21, and Maldah 20·76.

The deaths from *injuries* numbered 962, against 966 in the preceding month, and from "*All other causes*" not specified 20,701, against 22,290. Puri returned the highest death-rate from the unspecified diseases coming under the head "*Other causes*," viz. 16·56 per 1,000, next Backerganj 10·80, then Balasore 10·44.

The following table shows the death-rates among the five principal *classes* which comprise the population of the Bengal Province, viz, Hindus, Mahomedans, Christians, Other classes, and Buddhists arranged in order of sequence and compared with the mortality among these classes in corresponding month of 1890:—

				Ratio per mille during—	
				Feby. 1891.	Feby. 1890.
Hindus	...	...	...	25·32	20·52
Mahomedans	...	...	...	24·60	20·88
Christians	...	...	...	21·81	13·68
Other classes	...	...	...	21·00	13·44
Buddhists	...	...	...	20·64	21·36

With regard to *Age*, infants as usual perished in the largest numbers, 174·48 per 1,000 of population per annum; next came old persons (60 years and upwards) with a death-rate of 74·88 per 1,000. The lowest death-rate occurred between the ages of 5 and under 10 years and 10 and under 15 years, 10·20 each per 1,000.

Detailed information regarding the mortuary statistics of the forty-five districts of Bengal during the month under review will be found in the statement appended.

\* Means of 6 days.

Explanation.—Summary.—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period for 11 years. The humidity of the atmosphere is expressed in percentage, saturated air being represented by 100. A clear sky is denoted by 0 and an overcast sky by 10. The numbers are the numerical means or average of the rainfall in that district determined from the returns sent in by the sub-divisional stations for the period in question during past stations in the district sending in returns divided by the number of stations. A rainy day is one on which at least a tenth of an inch fell.

for the week ending Saturday, the 23rd of May 1891.

Explanation.—.....indicate that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any the returns are wanting, the corresponding spaces in the total rainfall columns are left blank. With reference to the column of rainy days, the definition of a rainy is when at least 0'1 inch of rain has fallen.

CALCUTTA, the 26th May 1891.

**SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS  
TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVA-  
TIONS TAKEN IN ASSAM, FOR THE WEEK ENDING SATURDAY,  
THE 23RD OF MAY 1891.**

THE meteorological conditions in Bengal for the first three days of the week were unimportant. On the 17th the pressure changes were small, and pressure continued generally above the normal. Temperature was falling slowly, and was below the normal at the eastern stations, and above it over the western half of the province, and winds were generally south-easterly and easterly. Conditions still remained slightly disturbed, and local storms with rain continued to occur in South-West, East, and North Bengal, though elsewhere they were almost absent. On the 18th an increase of pressure of about a tenth of an inch had taken place in Assam, and pressure was rising in the east, north, and west of the province of Bengal, though it was falling in Central Bengal, showing that conditions were continuing rather disturbed; temperature on this day was rising generally by about  $2^{\circ}$  to  $3^{\circ}$ . Again, rather heavy rainfall was reported from Assam, but elsewhere the local storms with rain were rather less numerous. On the 19th the rise had extended over the whole province, the increase being largest in the southern and south-eastern districts, where pressure became largely in excess of the normal, the excess equalling a fifth of an inch in South-East Bengal and a tenth of an inch in the west of the province. Temperature changes on this day were variable, and fairly general rainfall usually accompanying local storms had occurred in most districts except Orissa and South Behar. On the evening of the 18th and morning of the 19th a very severe local storm had occurred at Jessore during which 2.2 inches of rain fell.

On Wednesday the 20th the meteorological changes became more important, inasmuch as in the south of the Bay the first burst of strong south-west monsoon winds commenced to take place. Indications were also shown in the wind directions along the South Madras coast as well as by the pressure changes which were taking place, that bad weather was generating in the extreme south of the Bay in front of this advance of the monsoon winds. The meteorological changes in Bengal on the 20th were generally small, but local storms with rain continued to occur over a considerable part of the province. On the morning of the 21st the indications of the formation of a storm or a stormy area in the south of the Bay had developed considerably, and the centre of the storm was probably in the latitude of Negapatam. The small storm then commenced to move in a north-north-westerly direction, and on the 22nd its centre was about in the latitude of Madras, and on the morning of the 23rd, or the last day of the week under review, it had again advanced and was in the latitude of Nellore. During the whole of this time strong monsoon winds were blowing in the south and to a certain extent in the east of the Bay, and the south-west monsoon winds had certainly advanced half way up the Bay, but the history of the further advance of this storm area belongs to the following week. During this advance the changes in Bengal were that pressure continued to fall till the 23rd, when there was a slight rise. Temperature rose rapidly and became very largely above the normal in many districts. Winds were strongly easterly and south-easterly in the east and north of the province, and were bringing up large amounts of moisture, so that towards the close of the week some very heavy falls of rain were reported, and in some cases falls exceeding five inches were registered. The number of local storms, however, occurring on the last two days of the week except in the east and north of the province was decidedly smaller than in the earlier part.

*Pressure.*—The storm in the Bay had not affected the pressure in Bengal to any extent up to the close of the week, and the mean pressure was in excess of the normal by small amounts in almost all districts. The largest excess pressures were registered in South-East Bengal, where they equalled about five to eight hundredths of an inch, and the smallest were in South Behar and Chutia Nagpur, where pressure was almost normal. Over the whole province the excess has averaged about three or four hundredths of an inch, but the amounts have been decidedly irregularly distributed.

*Temperature.*—Owing to the rather heavy rainfall the mean temperature for the week has been decidedly in defect of the normal, the average temperature for the whole of Bengal being  $2^{\circ}$  below the normal, while in Assam there has been a defect of  $4.3^{\circ}$ . The largest defects in Bengal have been in the east and north of the province, where they are between three and four degrees.

*Rainfall.*—Has been in excess of the normal in all districts except Orissa and Chutia Nagpur, but the excess in South Behar has been exceedingly small. The falls in those three districts have only averaged about half an inch. On the other hand, in South-West, East and North Bengal and in North Behar the falls have equalled about twice the normal. East Bengal has thus received during the week an average fall of five and a-half inches, North Bengal one of four inches, South-West Bengal one of two and a-half inches, and North Behar a fall of an inch. The falls have been particularly large in the districts of Chittagong Hill Tracts, Dacca, Tipperah, and Rungpore. At the following stations falls of ten inches and upwards have been reported during the week:—Comilla, Daudkandi, Rungpore, and Ulipora, while falls of about 7 inches and upwards have been received at Magoora, Rangumati, Noakhally, Dacca, Naraingunge, Brahmunberiah, Kishoregunge, Mymensingh, Sherepore, Dewangunge, Bhowanigunge, Bagdogra, and Buxa.

In Assam during the week Silchar has received 7.65 inches, Sibsagar 3.69 inches, and Dhubri 2.65 inches of rain.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Saturday, the 23rd of May 1891 :—

The pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

In the weekly report from 12th to 18th April 1891 read "173" for "73" as the miles recorded on the 18th April 1891, and in the weekly report from 19th to 25th April 1891 read "156.6" for "156.5" as the maximum in sun of the 23rd April 1891.

CHINA SEA—BORNEO, NORTH-WEST COAST.

*Dangerous shoal reported north-east of North Furious shoals.*

THE British Admiralty has given notice (No. 182 of 1891) that Mr. Andrews, commanding the American ship *Big Bonanza*, has reported that, when off the north-west coast of Borneo, in approximately lat.  $7^{\circ} 6'$  N., long.  $116^{\circ} 24'$  E., the ship, drawing 17 feet water, struck on a shoal lying about 7 miles north-eastward of North Furious shoals.
